Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

0.1 This Office Action is in response to the amendment filed on 11/24/2006. Claims 1-3, 5-6, 13, 16, 26-29 are amended.

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thörington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-29 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-20 of copending Application No. 10/601,035. Although the conflicting claims are not identical, they are not patentably distinct from each other because the subject matter claimed in the instant application (10/600,786) is fully disclosed in the copending Application No. 10/601,035 for example:

Claims 1, 16, 26-29 of the present application (No. 10/601,035) and claims 1, 10, 14, 19-20 of US Application No. 10/601,035 are functionally equivalent.

As per claims 1, 10, 14, 19-20 (10/601,035) and claims 1, 16, 26-29 (No. 10/600,786),

Art Unit: 2133

application serial No. 10/601,035 claims "A method of resolving problems in an application program that runs on an Information Technology (IT) infrastructure that includes a plurality of IT components, comprising: generating a symptom that identifies a problem in the application program; identifying selected IT components in the IT infrastructure that may cause the problem in the application program, based on the symptom; obtaining a respective situation for a respective selected IT component, the respective situation being one of a set of component-independent predefined situation categories that is associated with the respective selected IT component, so as to provide status of the selected IT components in a common situation format that includes the associated one of the component-independent predefined situation categories; and analyzing the respective situations that are obtained to identify at least one problem in the selected IT components that may cause the problem in the application program." And application with serial No. 10/600,786 claims "A method of monitoring components of a system, comprising: associating status of at least one component of the system with one category of a set of component independent predefined situation categories so as to provide the status of the at least one component in a common situation format that includes the one category; analyzing the system status based on the common situation format representation of the status of the at least one component; and identifying a corrective action based upon the analysis of the system status. ...". It is obvious that both applications claim essentially the same limitations: associating status; situation format, component independent, analyzing and analyzing....

Allowable Subject Matter

2. Claims 1-29 would be allowable once timely filed a terminal disclaimer in compliance

Art Unit: 2133

with 37 CFR 1.321(c) or 1.321(d) to overcome the nonstatutory double patenting rejection.

Response to Arguments

3. Applicant's arguments, see Remarks, filed on 11/24/2006, with respect to claims 1-29 have been fully considered and are persuasive. The rejection of records has been withdrawn.

Conclusion

Any response to this action should be mailed to:

Commissioner of Patents and Trademarks, Washington, D.C. 20231

or faxed to: (703) 872-9306 for all formal communications.

Hand-delivered responses should be brought to Crystal Park II, 2121 Crystal Drive, Arlington, VA, Fourth Floor (Receptionist).
